

Cartier Iron Corporation

Management's Discussion and Analysis

This Management's Discussion and Analysis ("MD&A") provides discussion and analysis of the financial condition and results of operations of Cartier Iron Corporation (the "Company") for the 9 months ended September 30, 2018 and should be read in conjunction with the unaudited condensed interim financial statements and the accompanying notes which have been prepared in accordance with International Financial Reporting Standards.

The MD&A is the responsibility of management and is dated as of November 28, 2018.

All dollar amounts in the MD&A are stated in Canadian dollars unless otherwise indicated.

Additional information relating to the Company is available on SEDAR at www.sedar.com and the Company's website at www.cartieriron.com.

Forward-Looking Statements

This MD&A may contain, without limitation, statements concerning possible or assumed future operations, performance or results preceded by, followed by or that include words such as "believes", "expects", "potential", "anticipates", "estimates", "intends", "plans" and words of similar connotation, which would constitute forward-looking statements. Forward-looking statements are not guarantees. The reader should not place undue reliance on forward-looking statements and information because they involve risks and uncertainties that may cause actual operations, performance or results to be materially different from those indicated in these forward-looking statements. The Company is under no obligation to update any forward-looking statements contained herein should material facts change due to new information, future events or other factors. These cautionary statements expressly qualify all forward-looking statements in this MD&A.

See page 9 for Material assumptions and risk factors for forward-looking statements.

The Company

The Company is a public company engaged in the acquisition, exploration and development of mineral resource properties. The Company is a reporting issuer in Ontario and Alberta and its common shares are listed for trading on the Canadian Securities Exchange under the trading symbol "CFE".

Overall Performance

Private placement of units

On September 19, 2018, the Company completed a private placement of 5,000,000 units at a price of \$0.08 per unit for gross proceeds of \$400,000. Each unit consisted of one common share and one warrant entitling the holder to purchase one common share for \$0.12 until March 19, 2020.

Private placement of flow-through units

On September 19, 2018, the Company completed a private placement of 2,000,000 flow-through units at a price of \$0.10 per unit for gross proceeds of \$200,000. Each unit consisted of one flow-through common share issued pursuant to the *Income Tax Act (Canada)* and one warrant entitling the holder to purchase one common share for \$0.15 until March 19, 2020.

Grant of stock options

On April 10, 2018, the Company granted 200,000 stock options to a consultant, entitling the holder to purchase one common share for \$0.15 until April 10, 2023.

Settlement of accounts payable to related parties

On August 1, 2018, after receiving shareholder and regulatory approval, the Company settled unpaid management fees of \$848,849 owed to current and former officers or companies controlled by them as at March 31, 2018 through a combination of debt forgiveness of \$511,349 and the issue of 2,700,000 common shares at a deemed price of \$0.125 per common share in settlement of the remaining debt of \$337,500.

When issued, the common shares had a fair value of \$189,000 and the Company realized an additional gain on the settlement of accounts payable of \$148,500 representing the difference between the fair value and deemed value.

For the 9 months ended September 30, 2018, the Company recorded a combined gain on settlement of accounts payable of \$659,849.

Investment in Eloro

As at September 30, 2018, the Company held 2,543,500 Eloro common shares (December 31, 2017 - 2,543,500 common shares) representing 7.29% (December 31, 2017 - 7.72%) of the outstanding Eloro common shares. As at November 27, 2018, the Company's investment in Eloro had a fair value of \$1,170,010.

Gagnon

The Company owns a 55% interest in Round Lake (formerly known as Penguin Lake, Black Dan and Aubrey-Ernie) and Jeannine, consisting of 141 claims covering 74.68 square kilometres in the Fermont Iron Ore District in the Labrador Trough in northeastern Québec ("Gagnon").

Table 1: Summary of Gagnon Holdings

Property	Number of claims	Area (km²)
Round Lake (formerly known as Penguin Lake, Black Dan and Aubrey-Ernie)	120	63.51
Jeannine Lake	21	11.17
Totals	141	74.68

A joint venture was formed between the Company and Champion to incur additional exploration expenditures. If a joint venture partner does not fund its proportionate interest in the joint venture, its interest will be diluted and, when its interest is reduced below 10%, its interest would be reduced solely to a 1% royalty. The other joint venture partner will have the option to reduce the royalty from 1% to 0.5% by making a payment of \$3,000,000.

In the event that a joint venture partner proposes to acquire any property within 10 kilometres of Gagnon, the acquirer must offer the property at cost to the other party for inclusion in Gagnon.

As at September 30, 2018, facts and circumstances suggested that the carrying amount of Gagnon may exceed its recoverable amount. As required by International Financial Reporting Standard 6, *Exploration for and Evaluation of Mineral Resources* ("IFRS 6"), the Company assessed Gagnon for impairment. The Company concluded that there were a number of indicators of impairment, and accordingly, recorded an impairment of exploration and evaluation of \$15,260.

The Company has incurred the following cumulative exploration and evaluation expenditures on Gagnon:

Balance, December 31, 2017	\$ 3,861,605
Expenditures	15,260
Balance, September 30, 2018	3,876,865

As at September 30, 2018, Champion held 14,644,971 common shares of the Company (December 31, 2017 - 11,519,971), representing 25.73% of the outstanding common shares of the Company (December 31, 2017 - 24.4%). Pursuant to a standstill agreement, Champion may not sell or transfer more than 2,000,000 common shares during any 30-day period. One director of the Company is a director of Champion Iron Limited, the parent company of Champion.

Gagnon Holdings - Exploration

The Gagnon Holdings are adjacent and in close proximity to Arcelormittal's Mont Reed property which encompasses the Mont Reed Mine deposit.

On December 19, 2013, the Company reported the completion of a National Instrument 43-101 compliant Mineral Resource Estimate ("MRE") for the Penguin Lake Project, authored by Abder Ladidi, P. Geo., an independent Qualified Person of MRB & Associates ("MRB") of Val d'Or, Quebec. Based on 10 drill holes totaling 3,315 m, the MRE reported 531 million tonnes ("Mt") grading 33.1% Total Iron ("FeT") of In-pit Inferred Resources at a 15% FeT cut-off grade. The global in-situ mineral resource of 534.8 Mt grading 33.1% FeT was subject to a Whittle pit optimization to estimate the portion of in-situ Mineral Resource within the pit shell. P&E Mining Consultants of Brampton, ON were contracted by MRB to run the pit shell using a 1.05:1.00 \$CDN:\$US exchange rate, a mining cost of \$2.50/Tonne, and a charge of \$18.10/Tonne for the total processing, G&A, and freight costs. The process recovery, estimated to be 82%, an iron ore price of \$1.77/dmtu, and a 48° overall pit-slope, were used to complete the Whittle pit optimization. The sensitivity of the resource estimates is demonstrated by comparing the proportion of the mineral resources that may be economically exploited within the optimized pit shell to the global in-situ resource. A summary of the Global In-Situ Mineral Resource Estimate is presented in Table 2 and the results of the In-Pit Mineral Resource are presented in Table 3.

Table 2: Global In-situ Mineral Resource Estimate, Penguin Lake Project

Cut-off Grade	Global Inferred Resources*				Below Cut-off			
	Tonnes (millions)	Grade			Tonnes (millions)	Grade		
		FeT%	CaO%	MgO%		FeT%	CaO%	MgO%
15%	534.8	33.1	3.1	2.8	0.0	0.0	0.0	0.0
20%	534.7	33.1	3.1	2.8	0.1	15.4	2.1	1.7
25%	531.4	33.2	3.0	2.8	3.4	23.2	4.7	3.0
30%	466.4	33.9	2.9	2.8	68.4	28.2	4.1	2.7

Table 3: In-Pit Mineral Resource Estimate, Penguin Lake Project

Cut-off Grade	In-Pit Inferred Resources*				Below Cut-off			
	Tonnes (millions)	Grade			Tonnes (millions)	Grade		
		FeT%	CaO%	MgO%		FeT%	CaO%	MgO%
15%	531.2	33.1	3.1	2.8	0.0	0.0	0.0	0.0
20%	531.1	33.1	3.1	2.8	0.0	15.4	2.1	1.7
25%	527.8	33.2	3.0	2.8	3.4	23.2	4.7	3.0
30%	463.9	33.9	2.9	2.8	67.3	28.2	4.1	2.7

* The quantity and grade of the reported Mineral Resources within the Project are categorized as Inferred Mineral Resources. Inferred Mineral Resources are that part of a Mineral Resource for which quantity and grade or quality can be estimated on the basis of geological evidence and limited sampling and reasonably assumed, but not verified, geological and grade continuity. The estimate is based on limited information and sampling gathered through appropriate techniques from drill core. There is no guarantee that further exploration will upgrade the Inferred Mineral Resources to Indicated or Measured Mineral Resources. Mineral Resources which are not Mineral Reserves do not have demonstrated economic viability. The estimate of Inferred Mineral Resources may be materially affected by environmental, permitting, legal, title, taxation, socio-political, marketing, or other relevant issues.

The 10 drill holes that define the MRE drilled only the southern portion of the deposit. The deposit occurs in the form of a multiply refolded tightly overturned synform that produces a bowl-like shape of shallow dipping iron formation host rock. No recent drilling has been completed in the northern portion of the deposit however, the strong correlation of magnetic response to where iron formation surfaces and a historic drill hole located in the NW portion of the deposit allow for projection of the modelled iron formation and an estimate of the exploration target potential¹. The interpreted 3D model of iron formation includes an additional 700 to 900 million tonnes of similar grade as suggested by the current Inferred Resource, predominantly in the undrilled portion of the deposit to the north and northwest where additional resources might be identified.

A comparison of the current global in-situ mineral resource and in-pit mineral resource demonstrates the amenable geometry of the deposit to open-pit mining with 99+% of the in-situ resource occurring within the optimized pit shell. Furthermore, it is apparent that a natural geological cut-off grade exists for the modelled high-grade iron oxide deposit that is above the economic cut-off grade. As can be seen by the quantity and grade of below cut-off grade material at the higher cut-off grades, the natural cut-off grade of the deposit is near 25% FeT where only 0.6% of the material is below cut-off at an average grade of 23.2% and well above the economic cut-off grade of 15% FeT.

The current resource reported in the MRE comprises less than half of the modelled bow-shaped deposit and makes the Penguin Lake deposit the largest iron resource in the southern Gagnon Terrane.

Through 2016 and 2017, the Company completed metallurgical testwork studies and investigated base-case process flowsheet aspects for the Penguin Lake deposit. Metallurgical test results announced by the Company on April 28, 2015, indicate that the iron at the Penguin Lake deposit will be most efficiently liberated by a 2-stage process designed to yield iron-fines to produce a final sinter product.

¹ Exploration Target Potential is not a Mineral Resource. There is insufficient work completed to estimate the quantity and grade or quality of the exploration target on the basis of geological evidence and sampling. There is no guarantee that further exploration will define additional mineral resources from any portion of the exploration target potential.

The metallurgical tests were targeted towards producing a concentrate of 65% iron (Fe) and 4.5% silica (SiO₂) from an average sample-grade of 30% Fe. Stage-1 gravimetric separation tests by Wilfley Table on 18 samples returned average grades of 65.3% Fe, 4.5% SiO₂ and 1.1% MgO. Iron concentrate of similar grade (65% Fe / <4.5% SiO₂) will be sought from the second-stage regrinding and magnetic separation process. Additional tests to determine the process model for optimal second-stage iron recovery are on-going. Overall iron recoveries of >80% are targeted for the 2-stage circuit. The maximum 4.5% SiO₂ content for the Penguin Lake concentrate is a value imposed by the Company, guided by today's selective-market requirement for the highest-quality iron concentrate.

The Company is currently evaluating further exploration programs at the Gagnon Holdings while managing its capital resources to ensure it has sufficient capital to support its ongoing operations. Further exploration and development of the Company's properties are contingent upon the Company raising an adequate amount of financing.

Big Easy

The Company owns a 100% interest in Big Easy consisting of 467 mining claims (December 31, 2017 - 278) covering 116.8 square kilometres (December 31, 2017 - 69.5) located in Newfoundland and Labrador.

Pursuant to the definitive agreement, in order to complete the acquisition of Big Easy, the Company must issue common shares and incur exploration expenditures, as follows:

	Common shares	Exploration expenditures \$
Upon signing of definitive agreement (issued)	500,000	—
November 21, 2018 (issued and expended)	500,000	500,000
November 21, 2019	500,000	800,000
November 21, 2020	1,000,000	1,200,000
	2,500,000	2,500,000

The Company agreed to issue 100,000 common shares as a finder's fee, of which, 50,000 common shares with a fair value of \$4,500 have been issued and 50,000 common shares will be issued upon completion of the acquisition.

In the event that the Company does not issue common shares or incur exploration expenditures, the definitive agreement will terminate and the Company will transfer the mining licences and claims to the vendor.

The property is subject to a 3% net smelter royalty ("NSR"). On November 21, 2017, the Company exercised an option to reduce the NSR from 3% to 2% by making a payment of \$200,000, as follows:

Due date	\$
November 21, 2017 (paid)	25,000
December 31, 2017 (paid)	25,000
November 21, 2018, deferred until February 21, 2019 in consideration of the issue of 50,000 common shares	75,000
November 21, 2019	75,000

The Company also has options to reduce the NSR by:

- (a) 0.25% until November 21, 2021 by making a payment of \$250,000; and
- (b) a further 0.25% until November 21, 2022 by making a payment of \$250,000.

In the event that the Company wishes to sell any or all of the property prior to November 21, 2020, the Company must obtain the permission of the vendor.

With respect to the common shares to be issued to the vendor:

- a) the vendor will not grant a security interest in the common shares;
- b) the vendor has the right to sell tranches of less than 300,000 common shares;
- c) until November 21, 2021, the Company has a right of first refusal in the event that the vendor receives a third party offer to acquire any tranche of more than 300,000 common shares; and
- d) until November 21, 2021, the vendor shall not vote or encourage anyone else to vote against any resolution put before the shareholders of the Company upon the recommendation of the Board of Directors
- e) until November 21, 2021, the vendor shall not vote or encourage anyone else to vote in favour of:
 - (i) the election of board nominees that have not been proposed by the then Board of Directors, or

- (ii) any shareholder resolution or proposal unless the Board of Directors recommends voting in favour of such shareholder resolution or proposal.

Big Easy-Exploration

On May 1, 2018 the Company announced the successful completion of a 48-line kilometre Induced Polarization/Resistivity (IP/Res) survey at the Big Easy by MES Geophysics of St. John's, Newfoundland under the direction of Dr. Chris Hale, P.Geo., Chief Geophysicist for the Company.

Big Easy is a remarkably preserved and extensive low sulphidation epithermal gold-silver system that occurs on a prominent boundary between volcanic and sedimentary rocks in the Neoproterozoic Avalon Zone.

The new IP/Res data highlight an extensive mineralized epithermal system that includes both the Big Easy and ET mineralized zones where historical drilling intersected gold-bearing epithermal quartz veins including 6.05 g Au/t and 174 g Ag/t over 1.5m (Hole BE-11-13) and 7.65 g Au/t over 1.0m (Hole BE-11-07), (Newfoundland and Labrador, Department of Natural Resources, Mines Branch Assessment File Reports on the property). This chargeability anomaly can be traced over a strike length of more than four kilometres between the Big Easy and ET showings. This anomaly is open to the north and south. The Company previously staked an additional 98 claims to cover the potential northern extension bringing the total property to 467 claims covering 116.8 km². These claims cover a potential strike length of 23.5km.

The Company's exploration strategy is to complete targeted exploration by stepping out and defining the epithermal system to better understand the structural controls on the distribution of mineralization especially focusing on potential bonanza grade zones. The first step, the IP/Res survey, has confirmed that there is an extensive mineralized zone on the Big Easy property. Higher chargeability anomalies occur over both the Big Easy and ET showings. Midway and to the southwest there are two additional prominent anomalies that may reflect mineralization at depth.

On August 30, 2018, the Company announced that it had commenced a 2,000m drilling program at Big Easy.

Further information on Big Easy can be found in an independent National Instrument 43-101 Technical Report ("NI 43-101 Report") prepared by Mercator Geological Services Limited and filed by the Company on SEDAR (www.sedar.com) on June 5, 2018. The NI 43-101 Report summarizes all historical work on the property and has an effective date of April 20, 2018. Further exploration and development at Big Easy is contingent upon the Company raising an adequate amount of financing.

Risks and Uncertainties

Going concern

The Company is in the exploration stage and has no revenue. As at September 30, 2018, the Company had a working capital deficit of \$162,314 and for the 9 months ended September 30, 2018, the Company incurred a cashflow deficit from operations of \$286,682. The working capital deficit, losses and cashflow deficit limit the Company's ability to fund operations and the acquisition, exploration and development of mineral resource properties. As a result, there is significant doubt about the Company's ability to continue as a going concern.

The continued operation of the Company is dependent upon the support of its creditors and the Company's ability to secure advances from related parties and equity financings to meet its existing obligations and finance the acquisition, exploration and development of mineral resource properties. The Company is actively seeking to raise the necessary advances and equity financing, however, there can be no assurance that additional financing will be available.

Exploration

The Company is exposed to the inherent risks associated with mineral exploration and development, including the uncertainty of mineral resources and their development into mineable reserves; the uncertainty as to potential project delays from circumstances beyond the Company's control; and the timing of production; as well as title risks, risks associated with joint venture agreements and the possible failure to obtain mining licences.

Share of loss of an associate	(7,032)	(22,561)	(51,410)	(64,184)
Loss before income taxes	(147,401)	(158,422)	119,433	(383,772)
Deferred income taxes	11,800	—	54,892	—
Loss and comprehensive loss	(135,601)	(158,422)	174,325	(383,772)

9 months ended September 30

The income of \$174,325 in the current period compared to a loss of \$383,772 in the comparative period of the previous year was primarily the result of the following factors:

- a gain on settlement of accounts payable of \$659,849 to related parties.
- an increase in general and administrative reflecting an increase in the level of activity.
- the Company received no refundable tax credit and mining tax credit in the current period compared to \$103,752 in the previous year.

3 months ended September 30

The loss of \$135,422 in the current period is comparable to a loss of \$158,422 in the comparative period of the previous year.

Summary of Quarterly Results

	Q4 2016	Q1 2017	Q2 2017	Q3 2017	Q4 2017	Q1 2018	Q2 2018	Q3 2018
	\$	\$	\$	\$	\$	\$	\$	\$

Revenue	—	—	—	—	—	—	—	—
Income (loss)								
- Total	1,051,525	(39,431)	(185,919)	(158,423)	(431,031)	(139,901)	449,227	(135,601)
- Per share	0.031	(0.001)	(0.005)	(0.004)	(0.011)	(0.003)	0.009	(0.003)

Notes

1. Income for Q4 2016 reflects gains on the disposition of marketable securities of \$810,952 (including a gain of \$820,509 recorded on the disposition of \$2,000,000 common shares of Eloro to repay the Term Loan) and a gain on the settlement of amount due to Champion of \$80,000.

2. Loss for Q1 2017 reflects the receipt of refundable tax credit and mining tax credit of \$103,752.
3. Loss for Q4 2017 reflects an impairment of exploration and evaluation of \$571,802.
4. Income for Q2 2018 reflects a gain on settlement of accounts payable of \$659,849.

Liquidity and Capital Resources

Capital resources

At September 30, 2018, the Company had a cash balance of \$449,773 and an investment in Eloro with a fair value of \$1,119,140.

As the Company is in the exploration stage and has no revenue, the Company has financed its operations with advances from related parties and equity financings. The Company is dependent upon the support of its creditors and the Company's ability to secure advances from related parties and equity financings to meet its existing obligations and to fund its working capital requirements and the acquisition, exploration and development of mineral properties.

Estimated working capital requirements for 2019

	\$
Corporate and general costs (note 1)	200,000
Claim renewals and work commitments	15,000
Big Easy option payment to reduce NSR due on November 21, 2017 (note 2)	75,000
Big Easy acquisition exploration expenditures (Note 3)	500,000
	790,000

Note 1: Excluding consulting fees to management, the payment of which is being deferred, corporate and general costs for the years ended December 31, 2017 and 2016 were approximately \$185,000 and \$275,000, respectively. For the year ended December 31, 2018, the Company estimates its corporate and general costs at approximately \$200,000.

Note 2: On November 21, 2018, the royalty holder agreed to defer the payment of \$75,000 due on November 21, 2018 until February 21, 2019. In consideration of the deferral of the payment, the Company issued 50,000 common shares to the royalty holder.

Note 3: On November 21, 2018, the Company had made exploration expenditures of \$500,000.

Management is of the opinion that sufficient working capital will be obtained from advances from related parties and equity financings to meet the Company's liabilities and commitments as they become due. In the event that the Company is not able to obtain sufficient working capital from related parties and equity financings, the Company could consider selling Eloro common shares.

Transactions with Related Parties

	9 months ended September 30, 2018 \$	Outstanding as at September 30, 2018 \$
Consulting fees		
Gambier Holdings Corp., a company controlled by Thomas G. Larsen, for his services as Chief Executive Officer	99,000	41,051
Alexander Horvath, a director	18,000	23,730
Marlborough Management Limited, a company controlled by Miles Nagamatsu, for his services as Chief Financial Officer	72,000	45,900
J. Estepa Consulting Inc., a company controlled by Jorge Estepa, for his services as Vice President and Corporate Secretary	72,000	45,900

Settlement of accounts payable

As outlined in *Settlement of accounts payable to related parties* on page 1, on August 1, 2018, the Company settled unpaid management fees owed to officers or companies controlled by them as at March 31, 2018, as follows:

Officer	Debt \$	Debt Forgiveness \$	Debt Settled \$	Number of common shares issued
Thomas Larsen, Chief Executive Officer	93,249	49,499	43,750	350,000
Miles Nagamatsu, Chief Financial Officer	298,700	173,700	125,000	1,000,000
Jorge Estepa, Vice President, Corporate Secretary	291,900	166,900	125,000	1,000,000

Champion holdings in common shares of the Company

Champion holds 14,644,971 common shares of the Company, representing approximately 25.5% of the outstanding common shares of the Company.

A director of the Company is a director of Champion Iron Limited, the parent company of Champion.

New standards and interpretations not yet adopted

On January 1, 2018, the Company adopted the following amendment to standards:

IFRS 9, Financial Instruments ("IFRS 9")

This standard will replace *IAS 39, Financial Instruments: Recognition and Measurement*. IFRS 9 uses a single approach to determine whether a financial asset is measured at amortized cost or fair value, replacing multiple rules in IAS 39. The approach in IFRS 9 is based on how an entity manages its financial instruments in the context of its business model and the contractual cash flow characteristics of the financial assets. Two measurement categories continue to exist to account for financial liabilities in IFRS 9, fair value through profit or loss ("FVTPL") and amortized cost. Financial liabilities held for trading are measured at FVTPL and all other financial liabilities are measured at amortized cost unless the fair value option is applied.

The adoption of this accounting standard had no impact on these financial statements.

The following new standard will be effective for periods beginning on or after January 1, 2019:

IFRS 16, Leases ("IFRS 16")

This standard will replace *IAS 17, Leases*. IFRS 16 provides an updated definition of a lease contract, including guidance on the combination and separation of contracts. The standard requires lessees to recognize a right-of-use asset and a lease liability for substantially all lease contracts. The accounting for lessors is substantially unchanged from IAS 17. The Company has not determined the extent of the impact of IFRS 16 on its financial statements.

Financial Instruments and Other Instruments

A number of the Company's accounting policies and disclosures require the determination of fair value, for both financial and non-financial assets and liabilities. Fair values have been determined for measurement and/or disclosure purposes based on the following methods. When applicable, further information about the assumptions made in determining fair values is disclosed in the notes specific to that asset or liability.

Cash, accounts payable and accrued liabilities and due to Eloro

The fair values of cash, accounts payable and accrued liabilities and due to Eloro approximated their respective carrying value due to their short term to maturity.

Marketable securities

The fair value of marketable securities is estimated based on observable inputs.

Classification of fair value of financial instruments

The Company classified the fair value of its financial instruments measured at fair value according to the following hierarchy based on the amount of observable inputs used to value the instrument:

Level 1: quoted prices in active markets for identical assets and liabilities;

Level 2: inputs, other than the quoted prices included in Level 1, that are observable for the asset or liability, either directly or indirectly;

Level 3: inputs for the asset or liability that are not based on observable market data

Cash and marketable securities are classified as Level 1 financial assets.

Financial risk management

The Company's activities expose it to a variety of financial risks that arise as a result of its exploration and financing activities, including credit risk, liquidity risk and market risk.

This note presents information about the Company's exposure to each of the above risks, the Company's objectives, policies and processes for measuring and managing risk, and the Company's management of capital. Further quantitative disclosures are included throughout these financial statements.

The Board of Directors oversees management's establishment and execution of the Company's risk management framework. Management has implemented and monitors compliance with risk management policies. The Company's risk management policies are established to identify and analyze the risks faced by the Company, to set appropriate risk limits and controls, and to monitor risks and adherence to market conditions and the Company's activities.

Credit risk

Credit risk is the risk of financial loss to the Company if a counterparty to a financial instrument fails to meet its contractual obligations. Credit risk arises principally from the Company's cash and due from Eloro. The Company's limits its exposure to credit risk on its cash by holding deposits with high credit quality Canadian chartered bank.

Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting its financial liabilities that are settled in cash or other financial assets. The Company's approach to managing liquidity risk is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities as they come due, other than amounts owing to related parties. Accounts payable and accrued liabilities are subject to normal trade terms and the amount due to Eloro is due on demand.

Market risk

Market risk is the risk that changes in market prices, such as equity prices, foreign exchange rates, and interest rates will affect the Company's income or the value of its financial instruments.

Equity price risk

Equity price risk arises from the Company's marketable securities. The Company's approach to managing equity price risk is to optimize the return from its marketable securities within acceptable parameters for equity price risk. The Company estimates that if the fair value of its marketable securities as at September 30, 2018 had changed by 25%, with all other variables held constant, the income would have increased or decreased by \$6,883.

Currency risk

Currency risk arises from the Company's financial instruments and purchases that are denominated in a currency other than the Canadian dollar, the Company's functional currency. As all of the Company's purchases are in Canadian dollars, the Company limits its exposure to currency risk by maintaining its cash in Canadian dollars.

Interest rate risk

The Company's exposure to interest rate risk is limited due to the short-term nature of its financial instruments.

Capital management

Capital of the Company consists of share capital, contributed surplus and deficit. The Company's objective when managing capital is to safeguard the Company's ability to continue as a going concern so that it can acquire, explore and develop mineral resource properties for the benefit of its shareholders. The Company manages its capital structure and makes adjustments based on the funds available to the Company in light of changes in economic conditions. The Board of Directors has not established quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain the future development of the Company. In order to facilitate the management of its capital requirements, the Company prepares annual expenditure budgets that consider various factors, including successful capital deployment and general industry conditions. Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable.

As the Company is an exploration stage company and has no revenues, its principal source of capital is from the issue of common shares or advances from related parties. In order to achieve its objectives, the Company intends to raise additional funds as required.

The Company is not subject to externally imposed capital requirements and there were no changes to the Company's approach to capital management during the year.

Material assumptions and risk factors for forward-looking statements

The following table outlines certain forward-looking statements contained in this MD&A and provides material assumptions used to develop such forward-looking statements and material risk factors that could cause actual results to differ materially from the forward-looking statements.

Page	Forward-looking statement	Assumption	Risk factor
7	Liquidity and Capital Resources "Management is of the opinion that sufficient working capital will be obtained from advances from related parties and equity financings to meet the Company's liabilities and commitments as they become due."	Advances from related parties and equity financings will be obtained.	The Company is unable to obtain future financing to meet its liabilities and commitments as they become due.

Other Information

Additional disclosure for venture companies without significant revenue

The following table sets forth a breakdown of material components of the general and administration costs, capitalized or expensed exploration and development costs of the Company for the periods indicated.
